PROJECTS

MediAI | [GitHub](#) Aug 2026 - Sep 2026
React, Django, Django REST Framework, Gemini API, JWT, SQL
AI-powered medical information and triage application that converts structured symptom and patient inputs into validated AI guidance.

- Implemented JWT auth with protected consultations, access/refresh tokens, rotation, and token blacklisting.
- Built structured symptom assessment and Gemini AI triage with validated responses, warning signs, and self-care guidance.
- Added consultation history, draft/favourite filters, user profiles, and downloadable PDF reports.

JobPortal | [GitHub](#) Jul 2026 - Sep 2026
Django, HTML5, CSS3, JavaScript, Tailwind CSS, SQL
Django-based job portal with separate workflows for job seekers and employers to discover, post, manage, and apply for jobs.

- Built role-based job seeker and employer workflows; employers can post, manage, edit, and deactivate job listings.
- Implemented job discovery with location, category, and job-type filters, job detail pages, and unique view tracking.
- Added resume uploads/external apply links and an employer dashboard with job views, application counts, and applicant lists.
